Digital Literacy Project Report

Digital Literacy Project Report

Name: Akshit

Registration Number: 25BCY10111

Branch: CSE in Cybersecurity and Digital Forensics

Year: 1st Year

Course Code: CSE0001

Date: 26th March 2026

📌 INTRODUCTION

This project is based on the concept of digital literacy and its importance in today's world. As a Student Digital Ambassador, the goal was to create awareness about safe and responsible use of digital technologies.

The project includes tasks such as creating an infographic, building a digital portfolio, exploring online platforms, understanding email etiquette, and learning about cybercrime. These activities helped in developing practical digital skills.

📌 TASK 1

I created a digital literacy infographic using Canva. The infographic explains what digital literacy is, highlights safe internet practices, and covers email etiquette and professional online presence.

While designing, I focused on making the content visually appealing and easy to understand. One challenge I faced was organizing information in a limited space. However, the process was interesting and helped me learn design skills.

📌 TASK 2

I created profiles on GitHub, LinkedIn, and CodeChef. GitHub is used to showcase projects and manage code. LinkedIn is a professional networking platform, and CodeChef helps in improving coding skills.

Over the next four years, I plan to use these platforms to build my portfolio, connect with professionals, and practice programming. These will help me in internships and career opportunities.

📌 TASK 3

I used CodeChef to solve a beginner-level coding problem, which helped me understand basic programming logic. I also created a Google Form to test digital literacy awareness.

These tools are useful academically as they improve coding skills and help in collaboration. CodeChef helps in practicing programming, while Google Forms can be used for quizzes and surveys.

📌 TASK 4

Poor digital communication can lead to misunderstandings. For example, sending an email without a subject or proper greeting can appear unprofessional.

To avoid such issues, one should follow proper email etiquette, use clear language, and maintain a respectful tone. This ensures effective communication.

📌 TASK 5

While researching cybercrime, I was surprised by how easily people fall victim to phishing attacks. Many users are unaware of fake emails and links.

As a result, I will be more cautious while using the internet and avoid sharing personal information. This project has increased my awareness of online safety.

📌 CONCLUSION

This project helped me understand the importance of digital literacy and how to use digital tools responsibly. I learned about online safety, professional communication, and building a digital presence.

Overall, this project improved my awareness and skills, which will be useful in my academic and professional journey.
